

Dashboard Components

1. Revenue by Month

Purpose:

- Shows monthly sales trend.

Insight:

- Revenue increased significantly from February to March, indicating improving sales performance.

Business Use:

- Helps identify seasonal demand and monthly growth.
-

2. Revenue by Category

Categories include:

- Cake
- Colors
- Mugs
- Plants
- Raksha Bandhan
- Soft Toys
- Sweets

Insight:

- Colors generated the highest revenue.
- Soft Toys and Sweets also contributed significantly.
- Mugs and Plants generated comparatively lower sales.

Business Decision:

- Increase inventory and marketing for high-performing categories.
 - Improve promotions for low-performing products.
-

3. Revenue by Occasion

Occasion-based analysis includes:

- Anniversary
- Birthday
- Diwali
- Holi
- Raksha Bandhan
- Valentine's Day

Current Filter:

Holi

Insight:

- Holi generated nearly ₹5.8 Lakhs revenue.

Business Value:

- Helps management prepare seasonal marketing campaigns.

4. Top 10 Cities by Orders

Cities include:

- Berhampore
- Bilaspur
- Dhanbad
- Dibrugarh
- Dibrhad
- Gangtok
- Imphal
- North Dumdum
- Panchkula
- Raipur

Insight:

- Bilaspur, Dibrhad, and Imphal received the highest number of orders.

Business Use:

- Identify strong regional markets.
 - Improve logistics planning.
 - Allocate marketing budgets efficiently.
-

5. Top 5 Products by Revenue

Products include:

- Dessert Box
- Dolores Gift
- Harum Pack
- Magnum Set
- Quia Gift

Insight:

- Magnum Set generated the highest revenue.
- Quia Gift and Dolores Gift performed consistently well.

Business Decision:

- Focus inventory on top-performing products.
 - Bundle high-selling products during promotions.
-

6. Revenue by Order Time

Purpose:

Displays sales throughout the day.

Insight:

- Revenue peaks during certain hours while dropping during others.

Business Use:

- Helps optimize staffing.
- Schedule promotional campaigns during low-sales hours.
- Improve customer engagement timing.

Interactive Features

The dashboard includes dynamic slicers allowing users to filter data by:

- Delivery Date
- Order Date
- Occasion

Benefits:

- Interactive analysis
- Real-time filtering
- Easy comparison across multiple dimensions

Excel Features Used

The dashboard was built using:

- Pivot Tables
- Pivot Charts
- Slicers
- Timeline Filter
- Data Validation
- Conditional Formatting
- Named Ranges
- Excel Formulas
 - SUM
 - COUNT
 - AVERAGE
 - IF
 - INDEX
 - MATCH
- Formatting and Dashboard Design

From the analysis:

- Total revenue crossed **₹35.2 Lakhs**.
 - The business processed **1000 orders**.
 - Average customer spending is approximately **₹3,521**.
 - Average delivery time is **5.53 days**.
 - **Colors** emerged as the highest revenue-generating category.
 - **Magnum Set** is the top-performing product.
 - **Bilaspur, Dibrhad, and Imphal** are among the strongest-performing cities.
 - Sales increased from February to March.
 - Occasion-based sales demonstrate strong demand during festivals like **Holi**.
-

Business Recommendations

- Increase inventory for high-selling categories such as Colors and Soft Toys.
 - Launch targeted promotional campaigns for underperforming categories like Mugs and Plants.
 - Focus marketing efforts on high-revenue occasions such as Holi and Diwali.
 - Reduce delivery time below 5 days to improve customer satisfaction.
 - Expand operations in high-performing cities while introducing promotional campaigns in lower-performing regions.
 - Schedule offers during off-peak order times to improve overall sales distribution.
-

Project Outcome

This dashboard enables business leaders to:

- Monitor sales performance in real time.
- Make data-driven decisions.
- Identify revenue opportunities.
- Track product performance.
- Analyze customer purchasing trends.
- Improve operational efficiency.

- Support strategic business planning.
